Seongwon (Gabriel) Yoon

(+1) 470-667-7927 | gabrielyoon@gatech.edu | gabriel-yoon.github.io

Research Interests

Optical Interconnects, Silicon Photonics, Network Architecture, AI Infrastructure

Education

Georgia Institute of Technology — Atlanta, GA, USA
Ph.D. in Electrical & Computer Engineering (PI: Prof. Shimeng Yu) — *Aug. 2024 – May. 2029 (expected)*

Seoul National University — Seoul, Korea
B.S. in Materials Science and Engineering, Summa Cum Laude (GPA 4.11/4.3) — *Mar. 2015 – Aug. 2022*

Korea Science Academy of KAIST — Busan, Korea
High School Diploma — *Mar. 2012 – Feb. 2015*

Research Experience

Georgia Institute of Technology — Atlanta, GA, USA
Graduate Research Assistant, Laboratory for Emerging Devices and Circuits — *Aug. 2024 – Present*

- Co-designed collective communication (all-reduce, all-to-all) with photonic switch configuration and GPU placement to run LLM traffic at full link rate.
- Laid out a silicon photonic MZI switch (SiEPIC PDK) and simulated it in Ansys Lumerical FDTD, MODE, HEAT, and INTERCONNECT.
- Extended the htsim packet-level simulator with new GPU fabrics and calibrated NVSwitch baselines for MoE training and decode.
- Built a full-package Ansys thermal model of a co-packaged optical GPU node and its laser, ring-tuning, and energy budgets.

Seoul National University — Seoul, Korea
Undergraduate Researcher, Neuromorphic Materials and Devices Lab — *Mar. 2019 – Oct. 2021, Jun. 2023 – Aug. 2024*

- 1.4M 6T2R phase change memory synaptic arrays with stochastic leaky-integrate-and-fire neurons simulation

Work Experience

Imagoworks Inc. — Seoul, Korea
Software Engineer, Deep CAD Team — *Jul. 2022 – Feb. 2023*

- Fine-tuned generative models for 3D image dental solutions

Samsung Electro-Mechanics — Suwon, Korea
Research Intern, Materials Research Group — *Jan. 2022 – Feb. 2022*

- Analyzed TEM data for MLCC ceramic dielectric

Talks

Optical Interconnect for LLM, MoE and Agentic AI — Atlanta, GA, USA
Future of CMOS and Talent Workshop, Memory Wall and Interconnect Wall, Georgia Tech — *Mar. 2026*

Technical Skills

Photonic Simulation: Ansys Lumerical (FDTD, MODE, HEAT, INTERCONNECT), Photonic PDK

Device & Multiphysics: TCAD, Ansys Mechanical (thermal and structural)

Selected Honors and Awards

Jung-hun Foundation Scholarship — South Korea
Full tuition support for 2 years — *2018 – 2020*

Eminence Scholarship, Seoul National University — South Korea
Full tuition support for 1.5 years — *2015 – 2016*
